

# Electronics WORLD

THE ESSENTIAL ELECTRONICS ENGINEERING MAGAZINE

## Special Report: Consumer Electronics Design:

- MEMS
- Software development
- Hot bar bonding
- Adhesion with plasma

### INSIDE THIS ISSUE

#### Latest

- ▶ New adaptable computing acceleration platform

#### Feature

- ▶ Best way to address complaints

#### Regular Column

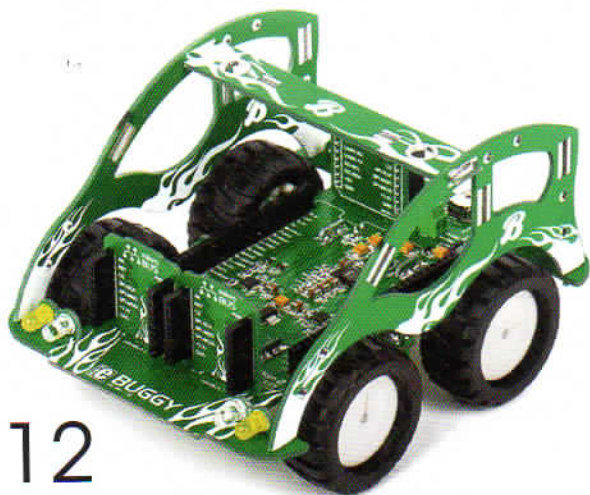

- ▶ It's (not) rocket science

*Also inside:*  
\* URGENT CALL  
TO DEAL WITH  
THE GROWING  
ELECTRONICS  
WASTE

# CONTENTS

## REGULARS

- 04 > **Trend**  
Interior lighting will create new automotive experiences
- 05 > **Technology**
- 38 > **Products**

## FEATURES

- 20 > **Addressing the electronics waste crisis**  
By Stephen Harding, Managing Director, Gough Engineering
- 22 > **Tiny MEMS in the big wide world of applications**  
By Mark Patrick, Mouser Electronics
- 26 > **The role of static analysis in secure software development**  
By Bill Graham, GammaTech
- 28 > **Modern integrated consumer electronics systems**  
By Stojce Dimov Ilcev, Durban University of Technology (DUT), South Africa
- 31 > **Hot bar bonding in the wearable technology market**  
As the market for wearable technology grows rapidly, Jan-Bart Picavet, Product Engineer for Hot Bar Technology at Amada Miyachi Europe, describes the need for advanced hot bar bonding methods
- 33 > **Solving complex adhesion problems with plasma**  
When traditional chemical adhesives fail to bond dissimilar materials, engineers often turn to plasma treatments. By Jeff Elliott, California-based technical writer
- 36 > **Dealing with complaints**  
By Sarah Perry, Managing Partner at law firm Wright Hassall

## COLUMNS

- 06 > **Digitizers**  
By Oliver Rovini and Greg Tate, Spectrum Instrumentation
- 10 > **PCB cleaning**  
By Mike Jones, MicroCare
- 12 > **MCUs**  
By Lucio di Jacio, Microchip Technology
- 16 > **Embedded design**  
By Dr Dogan Ibrahim, Near East University, Cyprus
