**Essentials of
Engineering Drawing
and *Graphics*
using AutoCAD**

Contents

Foreword vii

Preface ix

Note to the Instructor x

CHAPTER 1: INTRODUCTION

The Language of Engineers	1
Drawing or Drafting Practice	1
Manual Drawing Equipments	2
Drawing Board	2
Mini Drafter	3
T-square	3
Drawing Instrument Box	3
Drawing Pencils	5
Eraser	6
Templates	6
Set Squares	6
Protractor	6
Scale Set	6
French Curves	6
Drawing Sheet	7
Computer Aided Drafting (CAD)	9
Computer Hardware Minimum Requirement for CAD	9
Computer Software Requirement	10
Folding of Drawing Sheets	10
Lines	10
Lettering	11
Lettering A Vertical	13
Dimensioning	15
Hatching of Sections	17
Geometrical Constructions	18
<i>Exercises</i>	24
Scales	27
Types of Scales Used	27
Plain Scale	28
Diagonal Scales	29
Vernier Scales	35
<i>Exercises</i>	38

Short questions and answers 39

Conic Sections 39

Ellipse 41

Parabola 46

Hyperbola 48

Rectangular Hyperbola 51

Exercises 52

Short questions and answers 53

Cycloidal curves 54

Cycloid 54

Epicycloid 55

Hypocycloid 57

Trochoidal curves 59

Trochoid 59

Epitrochoid 61

Hypotrochoid 64

Involute 66

Archimedean Spiral 69

Logarithmic Spiral 73

Exercises 75

Short questions and answers 76

CHAPTER 2: PROJECTION OF POINTS

79

Introduction to projection 79

Conventions followed 80

Projection of a point in First Quadrant 80

Projection of a point in Second Quadrant 81

Projection of a point in Third Quadrant 82

Projection of a point in Fourth Quadrant 82

Exercises 88

Short questions and answers 89

CHAPTER 3: PROJECTION OF STRAIGHT LINES

91

Introduction 91

Projection of Straight line 91

Projection of a Line kept Perpendicular to HP and Parallel to VP 92

Projection of a Line kept Perpendicular to VP and Parallel to HP 92

Projection of a Line kept Parallel to Both HP and VP 93

Projection of a Line kept Inclined to HP and Parallel to VP 94

Projection of a Line Kept Inclined to VP and Parallel to HP 94

Trace of a line 96

Exercises 107

Short questions and answers 108

Projection of a Line kept Inclined to Both HP and VP 111

Rotating line method 112

Tips to Solve Problems when a Line is Inclined to Both HB and VP 113

- Projections of a Line When 120
- Projections of a Line when One End of the Line is in HP and the other in VP 122
- Trapezoidal Plane Method 136
- Exercises 147*
- Short questions and answers 150*

CHAPTER 4: PROJECTION OF PLANES **153**

- Introduction 153
- Positions of a plane 153
 - Projection of a Plane with its Surface Perpendicular to HP and Parallel to VP. 154
 - Projection of a Plane with its Surface Perpendicular to VP and Parallel to HP. 155
 - Projections of a Plane with its Surface Perpendicular to both HP and VP 155
 - Projections of a Plane with its Surface Inclined to HP and Perpendicular to VP 156
 - Projections of a Plane Inclined to VP and Perpendicular to HP 157
- Exercises 165*
- Short questions and answers 166*

CHAPTER 5: AUXILIARY PROJECTIONS **169**

- Point-view of a Line to get True Length of a Straight line 174
- Edge-View of a Plane to get True Shape of the Plane 177
- Successive Auxiliary Views 178
- Exercises 180*
- Short questions and answers 180*

CHAPTER 6: PROJECTION OF SOLIDS **183**

- Polyhedra 183
- Solids of Revolution 186
 - Oblique Solids 187
 - Frustum of a Pyramid or Cone 188
 - Truncated Sol ids 188
- Projection of Solids 188
 - Tips to Draw the Projection of a Solid 189
 - Projection of solids with its axis Perpendicular to HP and parallel to VP 189
 - Projection of Solids with its axis Perpendicular to VP and Parallel to HP 198
 - Projection of Solids with its Axis Parallel to Both HP and VP 208
- Exercises 214*
 - Projection of Solids with its Axis Inclined to HP and Parallel to VP 215
 - Change of Position Method 215
 - Auxiliary Plane Method 216
 - Projection of Solids with its Axis Inclined to VP and Parallel to HP 240
 - Tips to Mark Visible and Invisible Edges 241
 - Projection of Solids with its Axis Inclined to both HP and VP 252
 - Tips to Mark Visible and Invisible Edges 254
- Exercises 271*
- Short questions and answers 274*

CHAPTER 7: ORTHOGRAPHIC PROJECTIONS**279**

Introduction 279

Conversion of Pictorial Views into Orthographic Views 284

Selection of Views 285

One-view Drawings 285

Two-view Drawings 285

Three-view Drawings 286

Exercises 319*Short questions and answers* 327**CHAPTER 8: SECTION OF SOLIDS****329***Exercise* 369*Short questions and answers* 372**CHAPTER 9: DEVELOPMENT OF SURFACES****377**

Methods to Draw Development of Surfaces 378

Parallel Line Method 378

Radial Line Method 379

Zone Method 379

Lune Method 380

Triangulation Method 380

Exercises 419*Short questions and answers* 422**CHAPTER 10: ISOMETRIC PROJECTION****429**

Pictorial Projections 429

Isometric Scale 431

Method I 431

Method II 431

Isometric Projection and Isometric View 431

Methods to Draw Isometric Projection/Isometric View 432

Method of Points 434

Four-centre Method 435

Oblique Projection 472

Cavalier Projection 472

Cabinet-Projection 472

Exercises 475*Short questions and answers* 483**UNIVERSITY QUESTION PAPERS WITH SOLUTION****487**
