General Physics 1

4th Edition

3G E-LEARNING

TABLE OF CONTENTS

Preface	xiii
SECTION 1 MECHANICS OF PARTICLES	1
Scope	1
Overview	2
UNIT 1 UNITS AND MEASUREMENT	3
Introduction	4
The International System of Units	4
System Of Units	7
Measurement of Length	7
The Vernier Scale	8
Measurement of Large Distances	10
Estimation of Very Small Distances: Size of a Molecule	12
Measurement of Mass	14
Range of Masses	14
How to Measure Mass	15
Measurement of Time	17
Units of Measurement	19
Multiples and Submultiples	20
Accuracy, Precision of Instruments and Errors in Measurement	21
Significant Figures	23
Rules for Arithmetic Operations with Significant Figures	26
Rounding off the Uncertain Digits	27
Rules for Determining the Uncertainty in the Results of Arithmetic Calculations	28
Dimensions of Physical Quantities	29
Dimensional Formulae and Dimensional Equations	30
Dimensional Analysis and Its Applications	31
Conclusion	33

SECTION 2	KINEMATICS	39
	Scope	39
	Overview	40
UNIT 2	VECTORS	41
	Introduction	42
	Vectors and Vector Addition	42
	Vector Addition	43
	Perform Addition of Vectors	44
	Differentiate Vector and Scalar Quantities	45
	Components of Vectors	47
	Unit Vectors	49
	Calculate Directions and Magnitudes of Vectors	51
UNIT 3	KINEMATICS FUNDAMENTALS	57
	Introduction	58
	Velocity Vector and Acceleration Vector	59
	Characteristics of Distance and Displacement	61
	Linear Motion	62
	Velocity	64
	Average Velocity	64
	Instantaneous Velocity	65
	Acceleration	67
	Average Acceleration	67
	Instantaneous Acceleration	68
	Two Types of Acceleration	69
	Free-fall Motion	70
	Motion in One Dimension	71
	Types of Motion	72
	2D and 3D Kinematics	72
	Relative Motion	73
	Position and Displacement	74
	Displacement	74
	Speed Distance Time Formula	74
	Average Velocity	75
	Instantaneous Velocity	75
	Average Acceleration And Instantaneous Acceleration In 2- And 3- Dimensions	75
	Projectile Motion	77
	Uniform Circular Motion	77

UNIT 4	NEWTON'S LAWS	89
	Introduction	90
	Newton's Law of Motion	90
	Newton's First Law of Motion:	91
	Newton's Second Law of Motion:	91
	Newton's Third Law of Motion:	92
	Inertial Frame of Reference	92
	Non-inertial Frame of Reference	94
	Action at a Distance Forces	96
	Mass and Weight	97
	Mass	97
	Some other Key Points About Mass	97
	Weight	98
	Types of Contact Forces: Tension, Normal Force, Kinetic and Static Friction, Fluid Resistance	98
	Contact Forces	99
	Action-Reaction Pair	101
	Free-Body Diagrams	102
	Applications of Newton's Law	105
	Experiment on Forces	107
	Problem Solving Using Newton's Laws	109
UNIT 5	WORK AND ENERGY	115
	Introduction	116
	Potential, Kinetic, Mechanical and Power Energy	116
	Kinetic Energy	119
	Mechanical Energy	120
	Power Energy	122
	Another Formula for Power	124
	Equilibrium and Potential Energy Diagrams	124
	Conservative and Nonconservative Forces	126
UNIT 6	CENTER OF MASS, MOMENTUM, IMPULSE AND COLLISIONS	133
	Introduction	134
	Center of Mass	134
	The Center of Mass After Removal of A Part of A Body	136
	Centre of Mass for a Continuous Distribution	136
	Momentum and Impulse	137
	Impulse	138
	Momentum in Space	138

Specific Impulse	139
Relating Impulse and Momentum through the Impulse-Momentum Theorem	140
The Law of Momentum Conservation	142
Collisions	143
Elastic Collisions	143
Equations for Kinetic Energy and Linear Momentum	144
Inelastic Collisions	144
Completely Inelastic Collisions	144
Collisions in Two Dimensions	145
Arguments for purposefully slow (PS) training	148

UNIT 7

ROTATIONAL EQUILIBRIUM AND ROTATIONAL DYNAMICS

157

Introduction	158
Moment of Inertia	158
Moment of Inertia, General Form	159
Angular Position, Angular Velocity, Angular Acceleration	160
Angular Velocity	160
Angular Acceleration	161
Torque	163
Torque-angular Acceleration Relation	164
Static Equilibrium	165
Torque in Relation to Work and Power	166
Rotational Kinematics	168
Radian Measure of Angles	169
Rotational Kinetic Energy	172
Angular Momentum	173
Static Equilibrium Experiments	174
Rotation Motion	176

UNIT 8

GRAVITY

181

Introduction	182
Newton's Law of Universal Gravitation	182
Universal Gravity	183
Gravitational Field and Gravitational Potential Energy	184
Gravitational Fields	184
g and G	186
Potential and Potential Energy	188
Escape Velocity	192
Orbits	192
Types of Orbits	193

	Kepler's Laws of Planetary Motion	197
	First Law: Law of Ellipses	197
UNIT 9	PERIODIC MOTION	201
	Introduction	202
	The Basic of Periodic Motion	202
	Forces that Cause Periodic Motion	202
	Characteristics of Periodic Motion	204
	Applications of Periodic Motion	205
	Simple Harmonic Motion: Spring-Mass System, Simple Pendulum,	205
	Simple Pendulum	209
	Physical Pendulum	210
	Torsional Pendulum	211
	Damped Oscillations	212
	Periodic Motion Experiment	212
	Periodic Motion of a Spring and Mass	213
	Mechanical Waves	214
	Mechanical Wave Propagation Types	216
SECTION 3	WAVE AND FLUID MECHANICS	223
	Scope	223
	Overview	224
UNIT 10	MECHANICAL WAVES AND SOUNDS	225
	Introduction	226
	Mechanical Waves and Sounds	226
	Sounds	228
	Applications	230
	Wave Intensity	231
	Wave Interference	232
	Beats	233
	Standing Waves	235
	Standing Wave Resonances in Air Columns	236
	Doppler Effect	238
UNIT 11	FLUID MECHANICS	243
	Introduction	244
	Specific Gravity	245
	Pressure	246
	Fluid Pressure from Gravity or Acceleration	246

	Column on Top of Head	247
	Demonstration with can	248
	Air Pressure in Weather	248
	Balloons	249
	Different Altitudes	249
	Direction of Fluid Pressure	249
	Pascal's Principle	250
	Bernoulli's Principle	252
	Bernoulli's Principle Equation	253
	How to Explain Bernoulli's Theorem Experiment to Kids	255
	Buoyancy and Archimedes' Principle	256
	Archimedes' Principle	257
	Continuity Equation	258
SECTION 4	THERMODYNAMICS	265
	Scope	265
	Overview	266
UNIT 12	TEMPERATURE AND HEAT	267
	Introduction	268
	Meaning of Heat vs Temperature	268
	Temperature	269
	Zeroth Law of Thermodynamics and Temperature Measurement	271
	Temperature Scales	271
	Thermal Expansion	273
	Heat and Heat Capacity	274
	Calorimetry	276
	Mechanisms of Heat Transfer	277
	Convection	278
	Radiation	280
UNIT 13	IDEAL GASES AND LAWS OF THERMODYNAMICS	287
	Introduction	288
	Ideal Gas Law	288
	Internal Energy Of An Ideal Gas	289
	Internal Energy of an Ideal Gas and the Ideal Gas Law	290
	Kinetic energy	290
	Heat capacity of an ideal gas	291
	Heat Capacity of Ideal Gas at Constant Volume C_v	291
	Thermodynamic Systems	292
	The Zeroth Law of Thermodynamics	294
	First Law of Thermodynamics	294

Thermodynamic Processes	296
Adiabatic Processes	296
Isothermal Processes	296
Isobaric Processes	296
Isochoric Processes	297
Engines	297
Engine Cycle Efficiency	298
Entropy	298
2nd Law of Thermodynamics	299
Thermal Energy Reservoirs	299
Heat Engines	300
The Second Law: Kelvin Planck Statement	301
Reversible and irreversible processes	301
Carnot cycle	303

UNIT 14 ELECTROMECHANICAL ENERGY CONVERSION AND ROTATING MACHINES 309

Introduction	310
Induced Emf In Electromechanical Systems	310
Force and Torque on a Current Carrying Conductor	313
Force and Torque Calculation from Energy and Co-energy	314
Model of Electromechanical Systems	321
First Experience With Electric (Linear) Motors	323
Force and Torque in Electric Machines	328
Elementary Concepts	339
AC and DC Machines	342

UNIT 15 STRUCTURE AND PROPERTIES OF MATTER 357

Introduction	358
Classification of Matter	359
Physical State of Matter	359
Classification of Matter Based On Composition - Elements, Compounds and Mixtures	360
Elements	361
Compounds	361
Dalton's Atomic Theory	362
Atoms and Molecules	363
Chemical Formulae of Simple Compounds	364
Valency and Formulation	364
Empirical and Molecular Formula	366
Isotopes and Atomic Mass	367
Atomic Mass	367
Molecular Mass	368

UNIT 16

THERMODYNAMIC CYCLES

373

Introduction

374

Carnot Cycle

374

Ideal Rankine Cycle

377

 The Ideal Reheat Rankine Cycle

381

 Cogeneration

384

Air Standard Otto Cycle

385

Air-Standard Diesel Cycle

388

Air-Standard Brayton Cycle

392

Vapor-Compression Refrigeration Cycle

398

 Stages Of The Vapor-Compression Refrigeration Cycle

399

Conclusion

400

INDEX

405

INDEX

A

Air-standard-Otto cycle 385
Amplitude 204, 206
Angular Frequency 206
Angular motion 104
aphelion 194, 198
Atomic Mass 367

B

Beats 233

C

Carnot cycle 375, 376, 377, 403
center of mass 133, 134, 135, 136, 154
chemical energy 121
Circular path 106
collision 142, 143, 144, 145
Conservative forces 127
Constructive interference 233
Convection heat 278

D

Dalton's theory 362
Damped Oscillations 212
Destructive interference 233
diesel cycle 373, 388
Direct current 343, 352, 354
Doppler Effect 238

E

Earth's gravity 105
eccentricity 198
Electric energy 328, 329, 331, 339, 348
Electric motors 323, 324, 328
Electromagnetic energy 339
Electromagnetics 316
Electromechanical energy conversion 328, 329, 330, 350
Energy loss 293
equipotential surface 190
escape velocity 192
External circuit 354
External forces 106

F

Faraday's disc 311, 313
feed water heater (FWH) 381
Flux density 310, 333, 334, 336, 344, 346, 354
Force of friction 100, 101
Friction 129, 131

G

Gas-turbine cycles 384
Geosynchronous Orbits 195
Gravitational Fields 184
gravitational field strength 185, 186, 187, 188, 190, 191

gravitational potential 181, 188, 189, 191
 gravitational potential energy 181, 189, 191
 Gravity 127, 128, 131, 181, 183

H

Heterogeneous mixture 361
 Highly Elliptical Orbits 194
 Hydrochloric acid gas 365

I

ideal reheating cycle 381
 Impulse 133, 138, 139, 140
 International standard kilogram 14
 International System of Units 4, 5, 7, 14, 19
 inverse square law 186, 187

K

Kepler's laws of planetary motion 181
 kinetic energy 143, 144, 145, 378

L

Law of Ellipses 197
 Law of Equal Areas 198
 Law of Harmonies 198
 laws of planetary motion 197
 Linear motion 326
 Liquid sodium 359
 longitudinal waves 227, 229, 231
 Low Earth Orbits 193

M

Magnetically linear 311, 316, 317, 320
 Magnetic circuit 317, 318, 325, 330, 333, 334, 335, 339
 Magnetic energy 316, 321, 336, 341
 Magnetic field 310, 313, 315, 316, 318, 322, 323, 324, 325, 326, 327, 328, 329, 330, 332, 334, 339, 349
 Magnetic force 325, 327, 337, 338
 Magnetic reluctance 318
 Mathematical model 104
 matter 183

Mechanical energy 120, 121, 122, 328, 329, 330, 332, 339
 mechanical wave 215, 220, 226, 227, 228
 Meter-kilogram-second (MKS) 5
 modern cycles 377
 Molecular formula 366, 368
 Molecular Mass 368
 Molecule 363, 364, 366, 368
 Momentum 133, 137, 138, 140, 142, 144, 145
 motion 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 217, 220

N

Newton's law of universal gravitation 181
 nonconservative forces 126, 127
 North Pole 353
 Numerical value 7

O

orbit 182, 183, 190, 191, 192, 193, 194, 195, 196, 197, 198

P

Pendulum 203, 209, 210, 211
 perihelion 194, 198
 Periodic motion 202, 212
 Phase Angle 206
 Physical quantity 4, 7, 29, 30, 31, 33
 Planetary orbits 105
 potential energy 115, 116, 117, 118, 119, 121, 125, 126, 127, 131
 Potential energy 117, 124, 290, 293
 power 122, 123, 124

R

Rankine cycle 377, 378, 379, 380, 381, 382, 383, 399, 403

S

Salient-pole 343, 344, 346, 347
 satellites 193, 195, 197
 Scanning tunnelling microscope (STM) 363

Simple harmonic motion 205
simple pendulum 201, 209, 210
Sound waves 230
South Pole 353
Specific heat 274
Specific impulse 139
standing wave 235, 236, 237
Sulphur dioxide 362
surface waves 227
Synchronous motor 324, 325, 326, 327, 328,
329, 349, 350, 351

T

Thermal equilibrium 271
Thermal expansion 267, 273
Thermometer instrument 273
torsional pendulum 211
transverse waves 227, 229, 230
Two-dimensional collisions 145

V

vapor power 377
Velocity 204, 207, 213
Vernier scale 9, 10, 22

W

Wave interference 232
