FEATURES

- 18 2017 Hydraulics & Pneumatics Annual Salary & Career Report**
More than 90% of respondents said they were satisfied in their current positions, and a similar percentage would recommend the profession to young people.
- 26 Industrial Internet of Things: What's Holding Us Back?**
We've heard the hype about the Internet of Things (IoT) and its potentially revolutionary impact on manufacturing. But the adoption of IoT technology isn't happening as rapidly as the concept's supporters predicted.
- 30 All-in-One Actuator Is Showcase of Simplicity**
A self-contained modular actuator continues the trend of driving a hydraulic pump with a variable speed motor. But this one departs from convention with patent-pending features, including volume compensation to account for piston rod volume.
- 34 Where in the World Are Your Accumulators Going?**
Accumulators are pressure vessels, so they must be certified for the country in which they will be used. This isn't a problem for equipment sold and used in the U.S., but what if the machine your company produces heads overseas?

RMC150
Up to 8-Axis

RMC200 Up to 32-Axis

Introducing the new RMC200

Delta's most capable electro-hydraulic motion controller. The RMC200 controls up to 32 axes, and our familiar RMCTools software makes it easy to synchronize every one of them — from simple single-loop position control to complex dual-loop control of position-pressure/force. Make 'What's Next' happen for you. Just call 1-360-254-8688 or visit deltamotion.com

RMC200 module with door open to the right displaying labels. The terminal blocks feature push-in wiring and latch ejectors to speed wiring and simplify maintenance.

PENTON IS AN INFORMA BUSINESS

Multi-Port Selector Ball Valves Enable Easy Installation, Operation

FOUR- AND SIX-PORT selector valves enable bidirectional flow switching between ports. Valves feature one central inlet at the bottom and four or six outlets on the perimeter of the valve body. Operators can push the flat on the knurled knob while turning the knob to select the active port. Flow can also be directed from one of the outlet ports to the single inlet port. They are available with 10-32 or 1/4-28 threads, and work at supply pressures up to 500 psig.

BESWICK ENGINEERING, (603) 433-1188, www.beswick.com

Coupling Plate Improves Safety for Line Connection, Disconnection

THE BM3 MULTI-COUPLING plate is designed to enable simultaneous connection and disconnection of multiple large diameter (1½-in.) lines containing residual pressure up to 3625 psi at working pressures up to 5100 psi. They reduce operator error and improve key performance indicators (KPIs) to save time and money. The BM3 offers a single motion connection and an auto-locking system. It reduces downtime, leakage, and contamination of fluid.
