Abstract

The study was conducted primarily to describe the practices in Urban Gardening of the three selected project areas in Iloilo City namely Timawa Tanza Zone II, Bonifacio-Tanza and Esperanza- Tanza. The respondents of the study were determined by purposive sampling; the barangay officials and locals of the particular community were the respondents who are active participants in urban gardening project of their areas amidst the pandemic served as the interviewees. The data were gathered through the use of semi-structured questionnaire composed of open-ended questions that correspond to the description of the project, its implementations, involvements, challenges, benefits, and their recommendations of the respondents to other urban areas.
