# Materials Science and Engineering

# Table of Contents

<b>Preface</b>	<b>VII</b>
Chapter 1 <b>Introduction to Materials Science</b>	<b>1</b>
Chapter 2 <b>Essential Concepts of Materials Science</b>	<b>16</b>
a. Biomaterial	16
b. Composite Material	20
c. Acoustic Emission	72
d. Crystal Growth	73
e. Hume-Rothery Rules	80
f. Hysteresis	80
Chapter 3 <b>Atomic Arrangements in Solids</b>	<b>93</b>
a. Crystal	93
b. Crystallography	100
c. Amorphous Solid	105
d. Crystal Structure	106
e. Miller Index	116
f. Crystallographic Defect	120
g. Crystal Structure Prediction	125
Chapter 4 <b>Emerging Technologies in Materials Science</b>	<b>128</b>
a. Aerogel	128
b. High-temperature Superconductivity	136
c. Metamaterial	149
d. Nanomaterials	158
e. Programmable Matter	164
f. Quantum Dot	168
Chapter 5 <b>Chemical Bonding: An Overview</b>	<b>193</b>
a. Chemical Bond	193
b. Ionic Bonding	201
c. Covalent Bond	205
d. Metallic Bonding	209
e. Electronegativity	215
f. Intermolecular Force	223
Chapter 6 <b>Carbon Nanotubes: An Integrated Study</b>	<b>228</b>
a. Carbon Nanotube	228
b. Optical Properties of Carbon Nanotubes	240
c. Synthesis of Carbon Nanotubes	249
d. Carbon Nanotube Chemistry	255
e. Selective Chemistry of Single-walled Nanotubes	259

<b>Chapter 7</b>	<b>Understanding Metallurgy</b>	<b>265</b>
	a. Metallurgy	265
	b. Extractive Metallurgy	271
	c. Hydrometallurgy	274
	d. Metalworking	276
<b>Chapter 8</b>	<b>Allied Fields of Materials Science</b>	<b>344</b>
	a. Nanotechnology	344
	b. Polymer Chemistry	357
	c. Radiation Material Science	360

**Permissions****Index**

# Index

## A

- Acoustic Emission, 16, 72-73, 92
- Acoustic Emission Phenomena, 72
- Adsorption Hysteresis, 85
- Aerogel, 93, 128-136, 155
- Alloys, 2, 12-13, 46, 81, 114, 122, 124, 127, 179-186, 191, 203, 210-213, 265, 268-270, 278, 289-290, 293-295, 298-300, 306, 314-315, 335-336, 362-363
- Amorphous Solid, 94, 97, 105, 113, 184
- Atomic Structure, 2-3, 5, 103
- Autoclave Leaching, 275
- Autoclave Moulding, 30

## B

- Biomaterials, 2-3, 8, 16-19, 344, 348
- Biomineralization, 17, 92, 352
- Biopolymers, 19, 207, 358, 360
- Bonding, 5, 10, 39, 61, 68, 71, 96, 105, 111, 113-114, 122, 127, 171, 193-215, 217-219, 221, 223-227, 229, 236, 256, 270, 290, 329-330

## C

- Carbon Nanotube, 135, 228-234, 236, 238-239, 241-242, 244, 246-247, 251, 255-256, 259, 262, 264
- Carbon Nanotube Chemistry, 228, 255, 259
- Casting, 9, 28, 30, 51, 55, 183-187, 265, 268-270, 280-282, 290-305, 309, 317, 320, 333, 335, 340
- Cellular Automata, 164, 167, 192
- Chemical Bond, 114, 193-195, 197-198, 201, 205-206
- Cladding, 40, 265, 269, 329-331
- Claytronics, 165, 167
- Colloidal Synthesis, 169
- Composite Material, 11, 16, 20, 22-24, 38, 61-62, 238
- Concrete, 10-11, 20-23, 25-27, 32-33, 35, 37-44, 46-60, 70-71, 73, 91-92
- Contact Angle Hysteresis, 85
- Covalent Bond, 193-194, 196, 198-200, 205-207, 209, 211, 214, 217, 223, 226, 256, 260, 262-263
- Crystal, 4-5, 9, 16-17, 73-80, 93-117, 119-126, 128, 138-140, 148, 151, 159, 163, 165-166, 169, 171, 177-184, 186-187, 191, 198, 204-205, 209, 211, 213, 229, 235, 269, 271, 297, 335, 337-338, 349
- Crystal Structure, 5, 94-96, 102, 104, 106-108, 111-116, 120-121, 123, 125-126, 128, 138-140, 159, 179-182, 271, 335, 337
- Crystal Structure Prediction, 125-126, 128

- Crystallographic Defect, 98-99, 120, 128, 237
- Crystallography, 5, 93, 96, 100-101, 103-104, 106, 108, 117, 126-127, 271

## D

- Diffusion-control, 79
- Driving Force, 75-78, 160

## E

- Elastic Hysteresis, 84
- Electrical Hysteresis, 88
- Electrolysis, 273-276
- Electromagnetic Metamaterials, 150, 152, 155
- Electronegativity, 80, 193, 197-202, 205-208, 215-223, 227
- Electropermanent Magnets, 166-167
- Extractive Metallurgy, 267, 271-272, 274

## F

- Fibre-reinforced Plastic, 60-62, 65
- Forging, 186, 265, 269, 280-282, 305-316, 324, 333, 340
- Fullerenes, 8, 159, 231, 240, 246, 249, 253, 345-346, 350

## G

- Graphene Nanostructures, 159

## H

- High-temperature Superconductivity, 136, 138, 142
- Hume-rothery Rules, 16, 80
- Hydrometallurgy, 272-274, 276
- Hysteresis, 16, 80-92

## I

- Intermolecular Force, 223
- Interstitial Solid Solution Rules, 80
- Ionic Bonding, 193, 195, 197-198, 200-205, 218
- Iron-based Superconductors, 138, 142, 144-145, 147

## K

- Kinetics, 3, 7, 78-79, 161, 182, 185, 275
- Knudsen Effect, 130

## L

- Leaching, 57, 268, 272, 274-276
- Light Emitting Devices, 178

**M**

- Macro Structure, 5
- Magnetic Hysteresis, 81, 86-88
- Matric Potential Hysteresis, 86
- Metal Fabrication, 265, 332
- Metal Recovery, 276
- Metallic Bonding, 193, 195, 200, 203, 205, 209-214
- Metallurgy, 1-2, 6, 13, 17, 181, 187, 210, 213, 265, 267, 269, 271-275, 277, 279-283, 285, 287, 289, 291, 293, 295, 297, 299, 301, 303, 305, 307, 309, 311, 313, 315, 317, 319, 321, 323, 325, 327, 329, 331, 333, 335, 337, 339, 341, 343
- Metalworking, 265-266, 269, 276-280, 290, 305, 317, 319, 329, 333, 336
- Metamaterial, 9, 93, 149-151, 153-156, 166
- Metamaterials, 9, 149-158, 166, 191-192
- Metamorphose, 158
- Microstructure, 3-4, 7, 17, 129, 181, 183, 188, 233, 270-271, 297, 308, 319, 331, 342
- Miller Index, 95, 101, 109, 116, 128
- Models Of Hysteresis, 91
- Mortar (masonry), 32

**N**

- Nanomaterials, 2-4, 6-8, 158-164, 177, 344-346, 348, 350-351, 353-356
- Nanoparticles, 3, 126, 134, 159-164, 172-173, 175-176, 239, 250-252, 255, 257, 346, 348, 350-351, 355-357
- Nanostructure, 3-4, 6, 159, 161, 228, 255, 350
- Nanotechnology, 2, 7, 17, 158-159, 165, 168, 174, 228, 235, 237-238, 344-357, 363
- Nanozymes, 160
- Natural Nanomaterials, 158
- Nucleation, 74-78, 85, 87, 171-172, 186-187, 297, 303, 360

**O**

- Optical Properties of Carbon Nanotubes, 228, 240, 242

**P**

- Photocatalysts, 179

- Photodetector Devices, 178
- Plasma Synthesis, 170
- Polymer Chemistry, 344, 357-359
- Porosity of Aerogel, 130
- Pressure Bag Moulding, 29
- Programmable Matter, 14, 93, 164-167, 353

**Q**

- Quantum Dot, 93, 168-172, 174-178
- Quantum Wells, 167, 170, 175

**R**

- Radiation Material Science, 344, 360, 363
- Reinforced Plastic, 21-22, 60-62, 65
- Resin Transfer Moulding, 30, 63
- Rolling, 9, 54, 85, 228, 239-240, 265, 269-270, 282, 286, 296, 317-329, 340

**S**

- Selective Chemistry of Single-walled Nanotubes, 228, 259
- Solvent Extraction, 272, 275-276
- Substitutional Solid Solution Rules, 80
- Synthesis And Processing, 6
- Synthesis of Carbon Nanotubes, 228, 249

**T**

- Tank Leaching, 275
- Terahertz, 153, 155
- Thermal Spraying, 189, 270, 290
- Thermodynamics, 3, 5-7, 87, 220

**V**

- Vacuum Bag Moulding, 28

**W**

- Work Hardening, 270, 306-307, 319, 335-339, 341-342

**Y**

- Ybacio Superconductors, 138
