ABSTRACT

Pirates attack have been some of the major problems that seafarer encounter in their career. Pirates are the people who act violence and steal money from the seafarer. They are very dangerous. It gives them trouble onboard, the worry of their family and the trauma they are suffering after the pirate attack. However, the study comprises of seafarer that have already experienced the attack and what are the impact to them. The safety measures onboard used and what are the things to do in order to prevent such a horrible attack. This study also helps what are the things you must do to overcome the attack. Being calm and the prayer are most of the answer. Being able to prepare for the voyage like when going through pirate infested areas, you must be equipped with the knowledge as a seafarer so that you can prepare and be safe in the upcoming incident.
